Application No. 10826435 (Docket: CNTR.2075) 37 CFR 1.111 Amendment dated 10/20/2007 Reply to Office Action of 10/18/2007

AMENDMENTS TO THE ABSTRACT

Please delete the section entitled "ABSTRACT OF THE DISCLOSURE" in its entirety and substitute the following section therefor:

ABSTRACT OF THE DISCLOSURE

The present invention provides an apparatus and method for performing cryptographic operations on a plurality of input data blocks within a processor. In one embodiment, an apparatus for performing cryptographic operations is provided. The apparatus includes a cryptographic instruction fetch logic and execution logic. The fetch logic is disposed within a microprocessor, and is configured to receive a cryptographic instruction is received by a microprocessor—as part of an instruction flow executing on the microprocessor. The cryptographic instruction prescribes one of the cryptographic operations, and also prescribes that an intermediate result be generated. The execution logic is disposed within the microprocessor and is operatively coupled to the cryptographic instruction. The execution logic executes the one of the cryptographic operations, and generates the intermediate result.
